My Settings from Full HD/HD Video with High Data Rates 2k & Up to convert to Small File Size with Good Quality

Format: MP4
Dimension: Same as Source
FPS: Same as Source
Bitrate: 1,500
2-Pass Filter: Enabled
1st Pass Turbo: Disabled
Encoder: Slow
Audio: Auto Pass Thru

The Results are amazing.

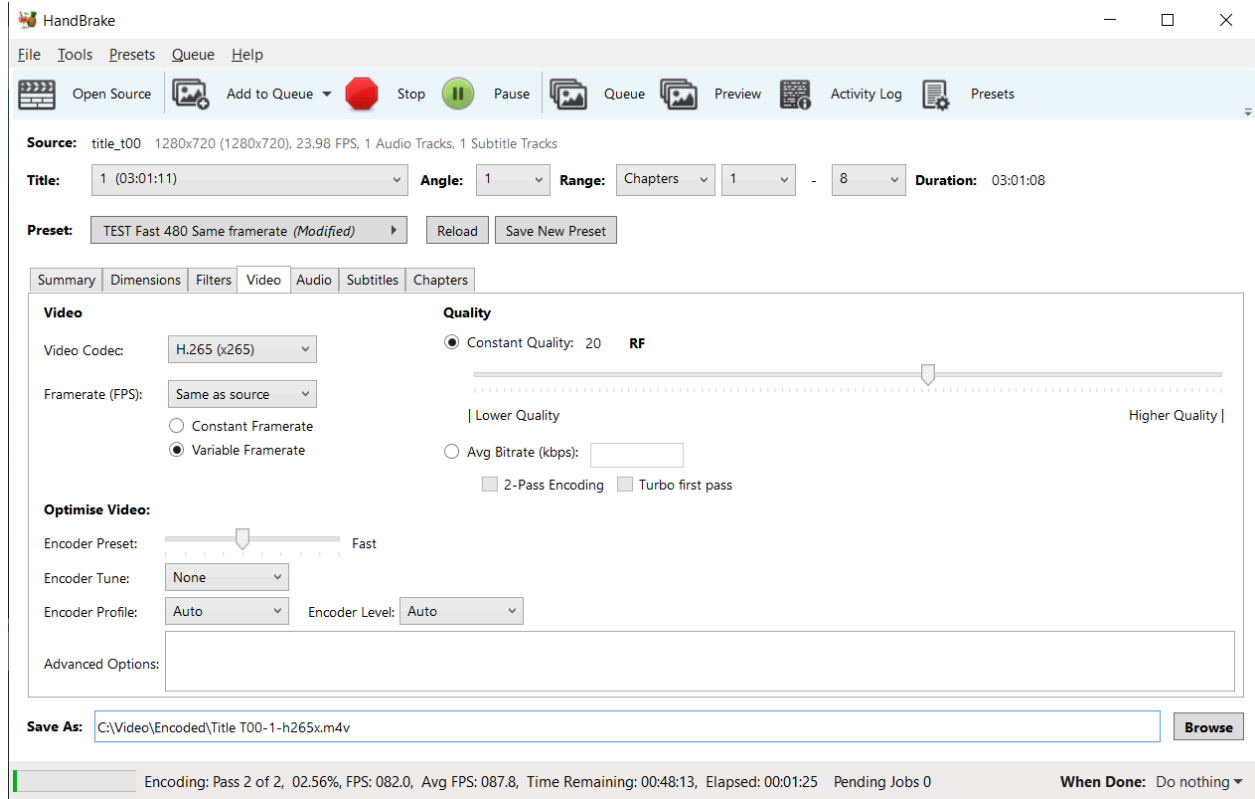

[REPLY](#)

muses mousike

after reading this, i use my previous settings then i disabled the 2 pass then use denoise hq-medium & sharpen lapsharp-medium.. the result is better.. it is close enough with the original..

[REPLY](#)

Dialing in on good settings

Proved Plex works with MKV x265 COOL! Works in streaming

I'll be we can encode these better too

<https://www.ryananddebi.com/2020/10/04/handbrake-h-265-nvenc-1080p-ripping-chart-and-guidelines/>

Setting	Resulting File Size	Compression (% of original file)
CQ 22	14.3 GB	50.35%
CQ 24	8.6 GB	30.28%
CQ 26	6.5 GB	22.89%
CQ 28	4.9 GB	17.23%
CQ 30	3.7 GB	13.03%
CQ 32	2.9 GB	10.21%

Encoding range 22 to 26

<https://www.macxdvd.com/mac-dvd-video-converter-how-to/x264-vs-x265.htm>

Is x265 worth it?

https://www.reddit.com/r/DataHoarder/comments/7tv56p/10_gb_x264_vs_3gb_x265_video_files/

dmenezes · 3y

24.01TB ZFS+Cloud

My experience with x264 vs x265 is that the same content is available on the latter at 720p with a file size 10-30% smaller than the former at 480p, and (at least to my eyes) the quality is indistinguishably good on both of them. YMMV, and I haven't done any alt-tab comparisons here, so this is basically a "feelings" comparison, but I've been watching and archiving content on x265 for a while now with no regrets.

Dialing in

MKV

DVD - NL light ULight? Unsharp Light Ulight?

Deinterlace Decomb

X265 10 bit

Framerate same as original - variable

Q20+... Q26? Q40 attempting ... working

Faster? Slower?

ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3

Fast decode?

English audio - stereo downmix AAC 160

All subtitles

===

Quality 40 is awful - NO GO

34 - still very glitchy

23 August 2021

Observations of encoding tests

ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3

Original

9100

Switched vs noswitched

2467000KB

2158000KB

x265 vs x264 - 5% savings - choose x265

Switched - 2.5% change - major quality difference - KEEP switched

Fast decode - no visual difference, 0.14% cost - KEEP fast decode

Med is 2% LARGER than vfast - do we see a difference?

Medium motion is smoother. What's the cost in encoding time?

Slower - 271 minutes

Medium - 118 minutes

Fast - 112 minutes

vfast - 79 minutes

Choose medium or fast

==

Choose quality

Want something

Quality - 22 to 26

24 with switched looks almost perfect

Want at least a 3x compression

26, even switched and fast, starts to get the pixelation distortion

24 switched gets 4.6x compression -

Worth trying a 25 vs 24 vs 23 vs 22

8bit vs 10bit x265 - 10bit looks smoother -

2231 vs 540 vs 448 MB -

10 bit - 4.13 compression - 24.2% vs

8 bit 5.0x compression - 20%

Choices:

MKV

Audio

AAC 160 stereo downmix

X265 10 bit

Variable bit rate - Same as original

ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3

Medium or fast... narrowing

Quality 20 to 26... narrowing

Fast decode - ON

23 August 2021

26 medium actually worked!

24 for the pretty moves, IF you want to, but 26 medium looks great

Big difference between med and fast... so if you're gonna do it, go med

Minor, almost no diff between med and slow, but slow has much greater size

Med and fast have almost the same size output, but med is 0.6% larger (4.4 vs 4.5x
compression ratios)

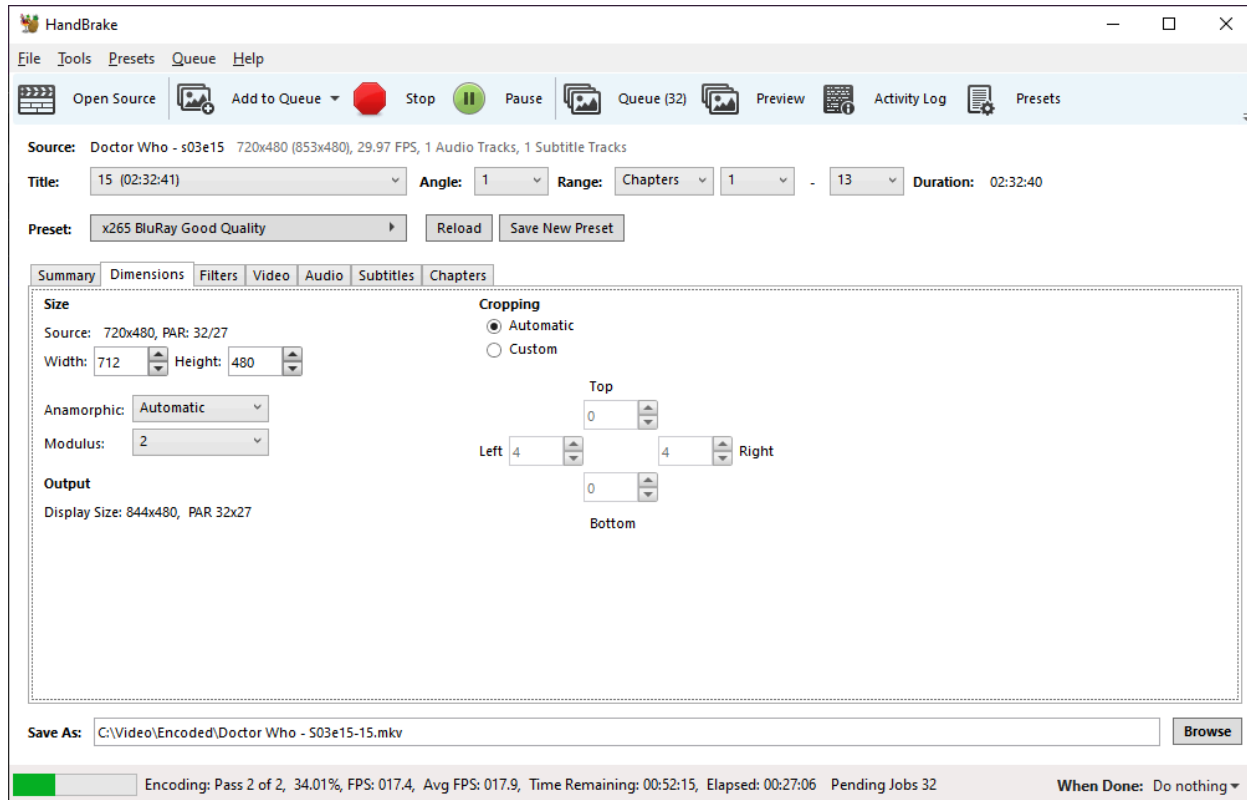

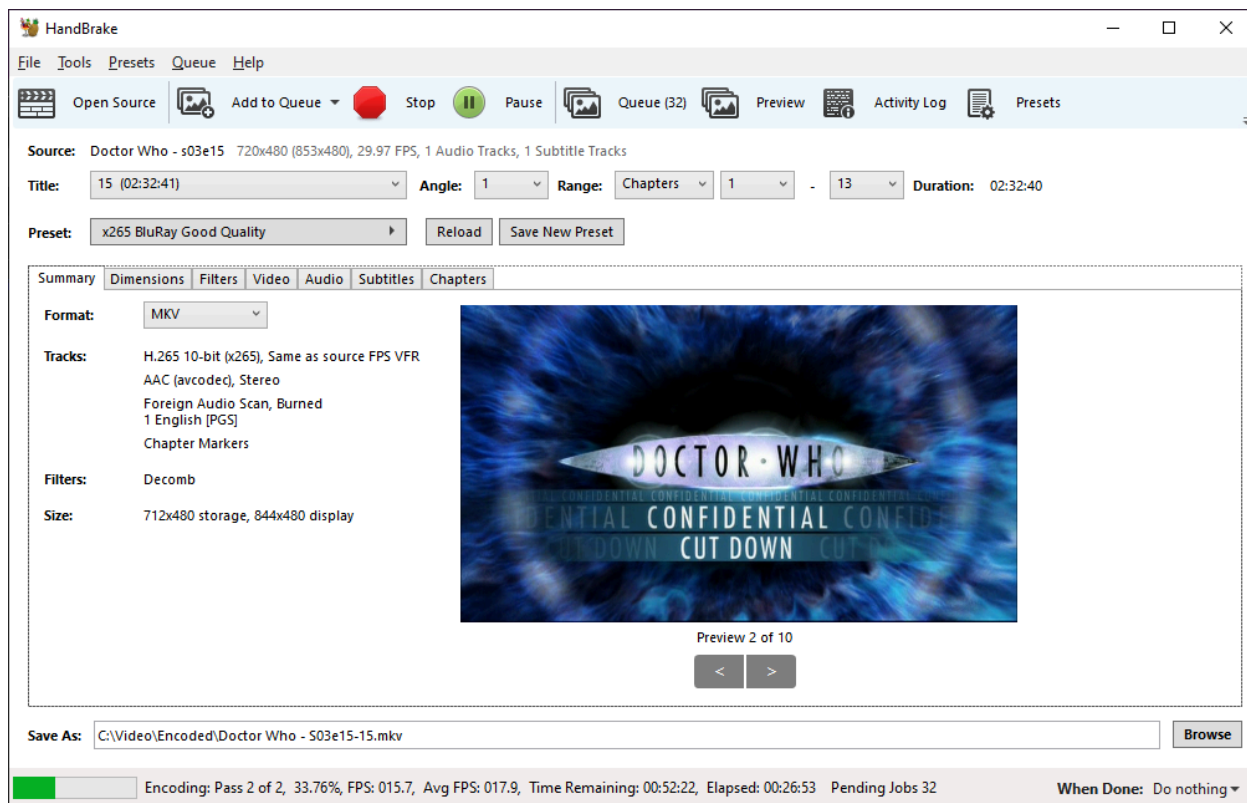

Medium encoding time 144 minutes

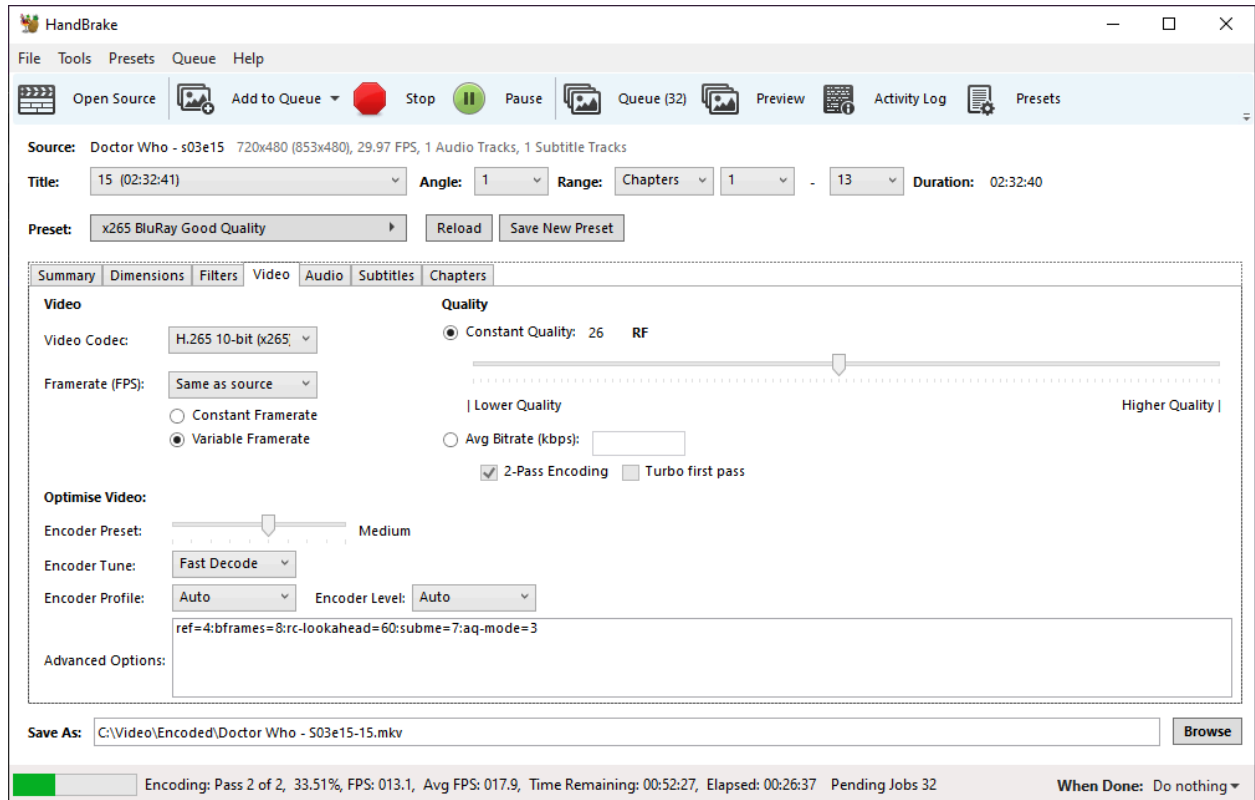

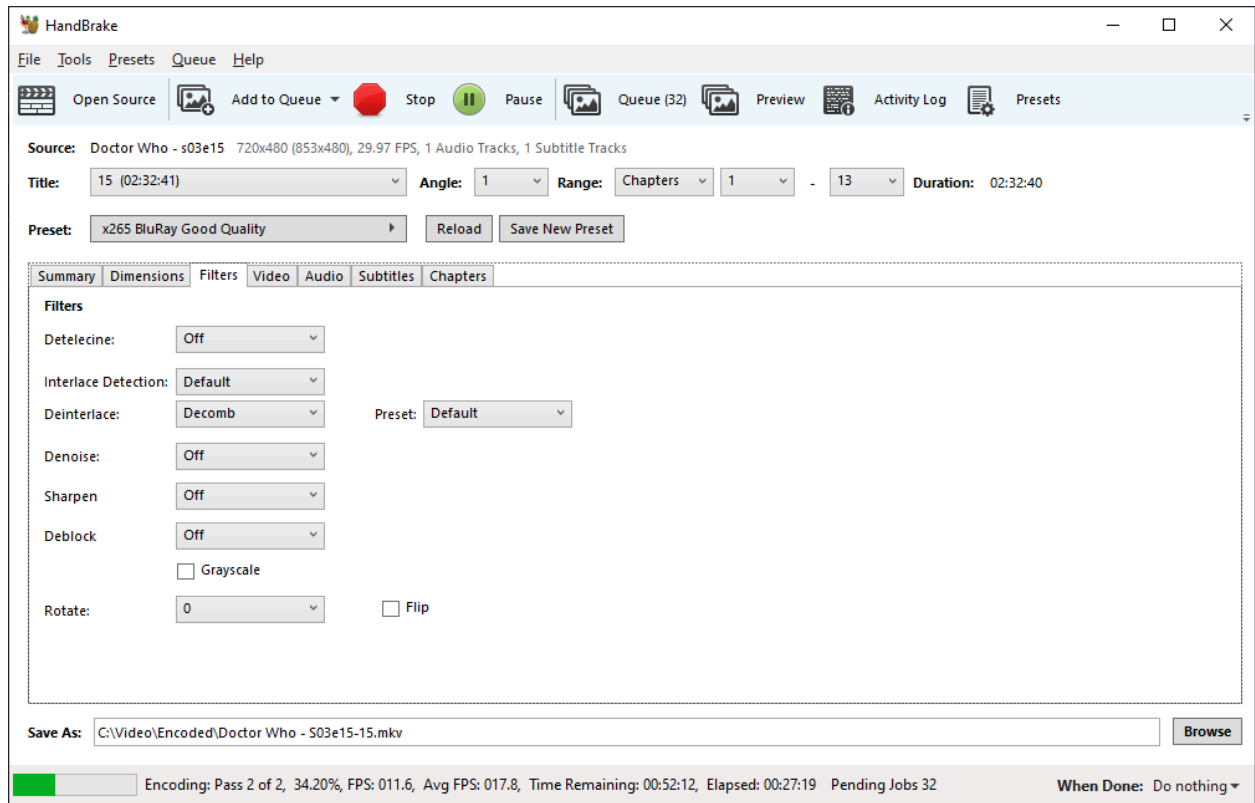

Fast is 97 minutes

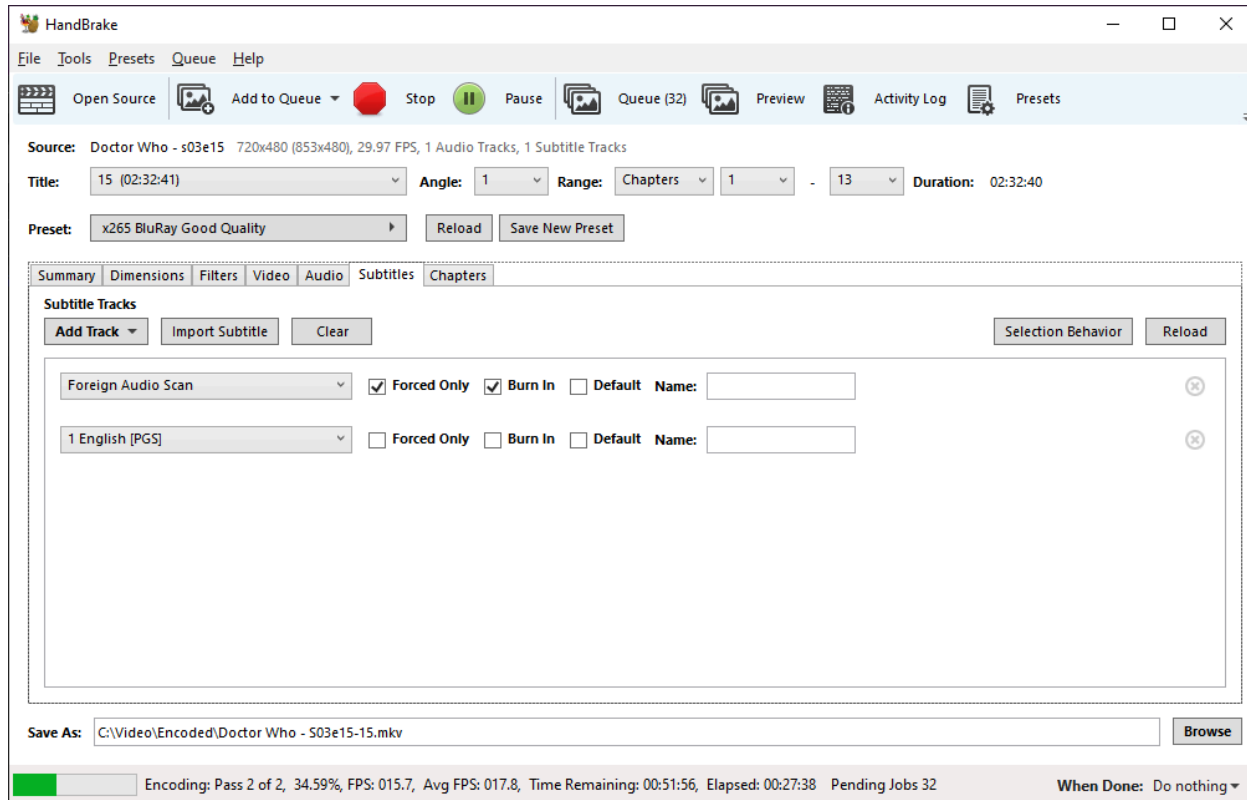

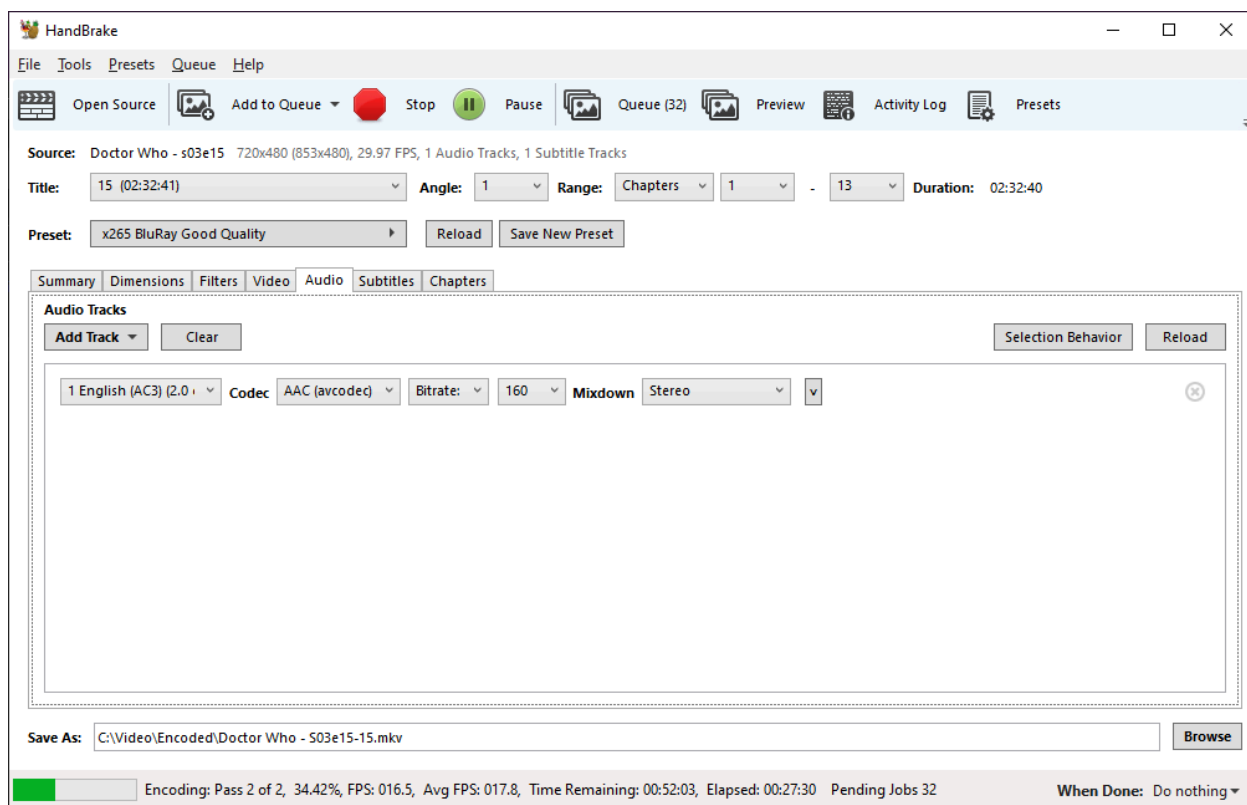

LEFT OFF - comparing slow, med, fast; Q22 to 26; Check the compression on these settings
and the output quality

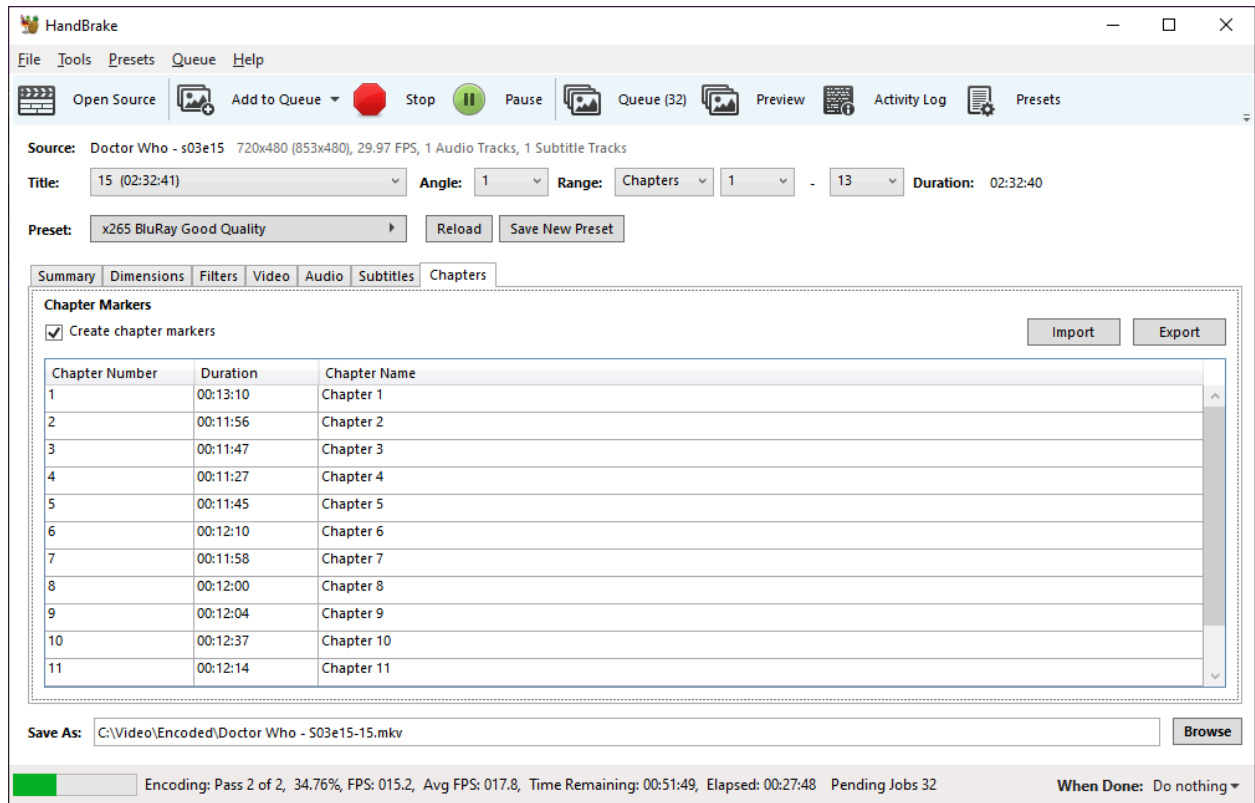

Dr Doctor who with settings at Q24

====

Choices:

MKV

Audio

AAC 160 stereo downmix

NO passthrough channel

Only English Audio

X265 10 bit

Variable bit rate - Same as original

ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3

Medium

Quality - Usually 26... 24 for great quality

Encoder Tune: Fast decode

Clear and re-add for long lists to make the order correct

All subtitles

Foreign Audio Scan - forced only, burn in

Move english(es) to positions right under Foreign Audio Scan

5x-30x compression ratio, BEAUTIFUL output for bluray real-life movies (working on animation, DVD, and grainy, still)

Screenshots above to see all of the settings

Looking at Chernobyl compression ratios

Episode 3

14,205,472

=====

TODO try DVD without unsharp

Unsharp is causing edge distortion, but does clean up the grain... need something subtle

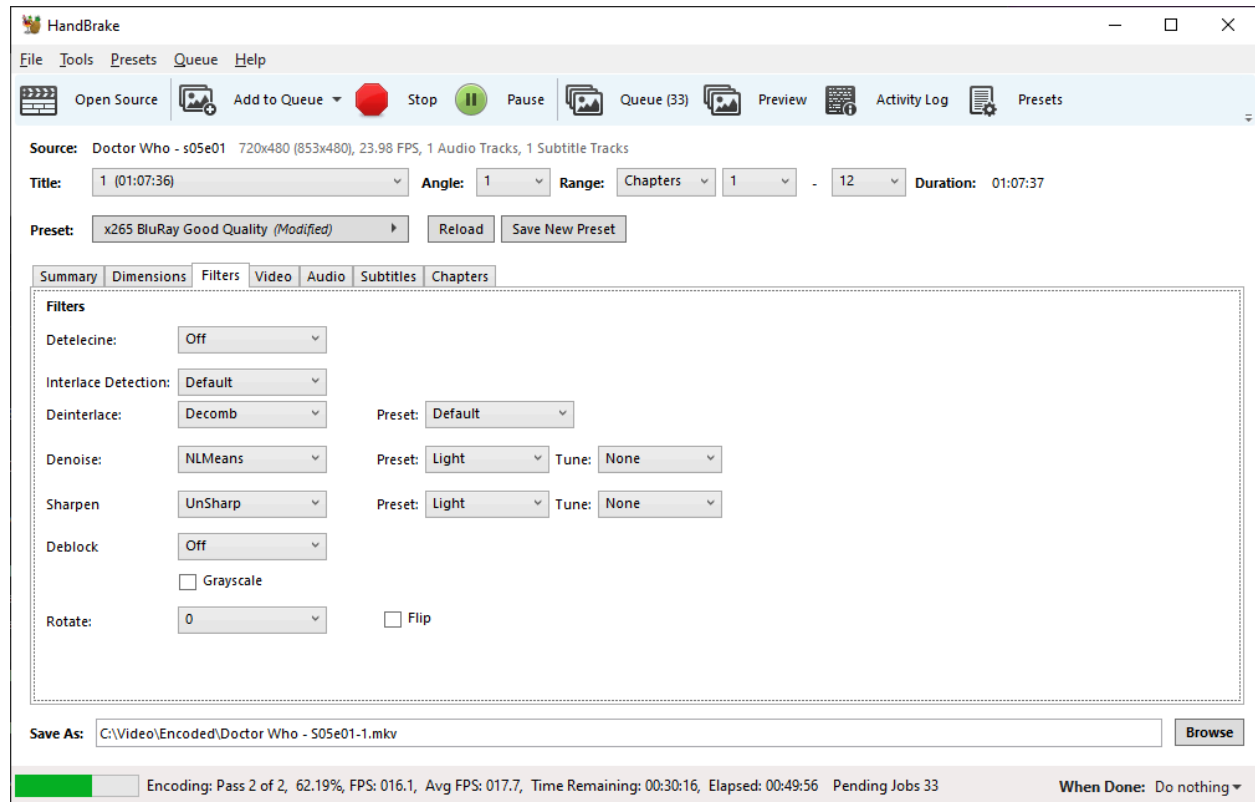

Can also see the distortion from the DVD encoding, can we clean it up?

TODO see if DVD's do fine at Q26 or 24... can we go 30?, Bluray at 26 or 24
(working on animation, DVD, and grainy, still)

Ninja turtles look good with

Teenage Mutant Ninja Turtles-x265 Faster 24 NLDenoise Light Unsharp Light

Try a doctor who with the same

They look bad too... These fuzzy movies do that

Men In Black T00-1 NLMeans Ultralight None Q20

This one looks good

A Knight's Tale T00-1 NLMeans Ultralight None Q18

Good one

Doctor who Series 4 NLMeans ultralight Q22 or 23? 20 looks great, but -its 3GB/hour

23 is probably a good choice

Peter capaldi... Title T00-1 NLMeans Ultralight None Q16

Men In Black 3 T00-1 NLMeans Ultralight None Q20

Good one

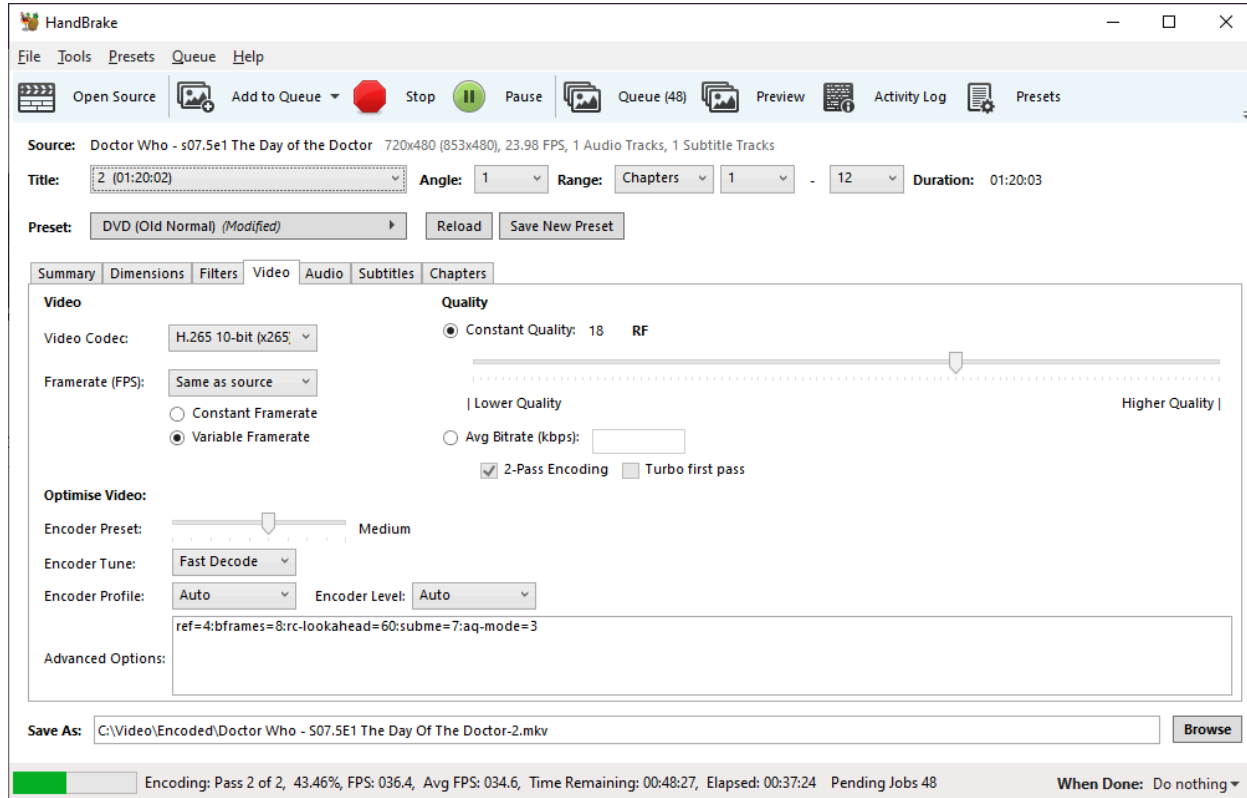

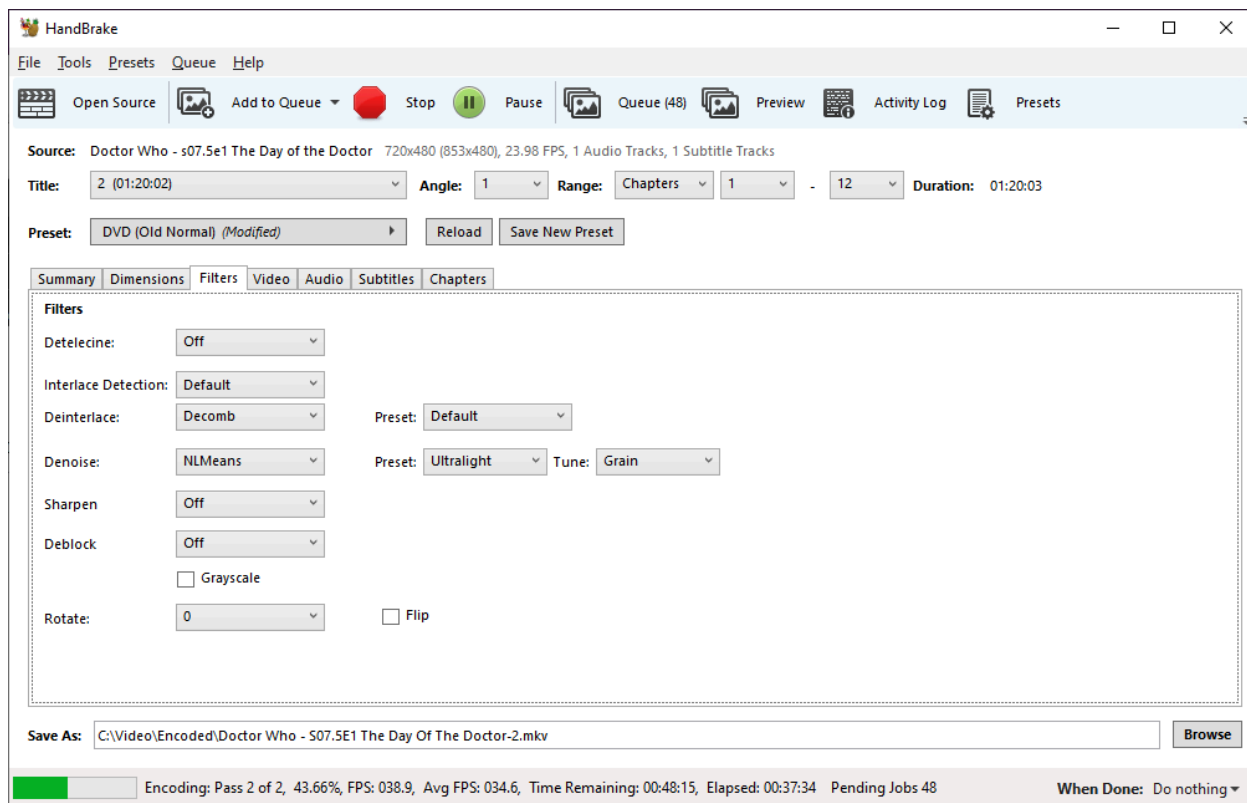

Doctor Who - S05e13-1 NLMeans Ultralight Grain Q18

Matt Smith Who - GOOD

Avengers - Infinity War-2

Good One

Encoding Doctor Who Season 5-7.5

==

Next - fix naming on Peter Capaldi Doctor Who

TODO - Doctor Who Season 2 and 3 have naming/alignment problems

31 August 2021

Avengers end game - Q20 - noticeably better than Q22

Captain Marvel - Q20 noticeably better

Low light, fine details - still compresses heavily - to about the size we'd expect, but the washed out movies work better with lower Q number (higher quality) - bitrate is consistent tho

Arrival - GOOD

Arrival T00-1 NLMeans Ultralight Unsharp Light Q12

🔥 Doctor Who Series 4 Disc 1 T03-1 NLMeans Ultralight Q22	8/31/2021 6:24 AM	MKV Video File (V...	1,413,250 KB	00:45:47

BEGIN Procedure for ZACH 202209

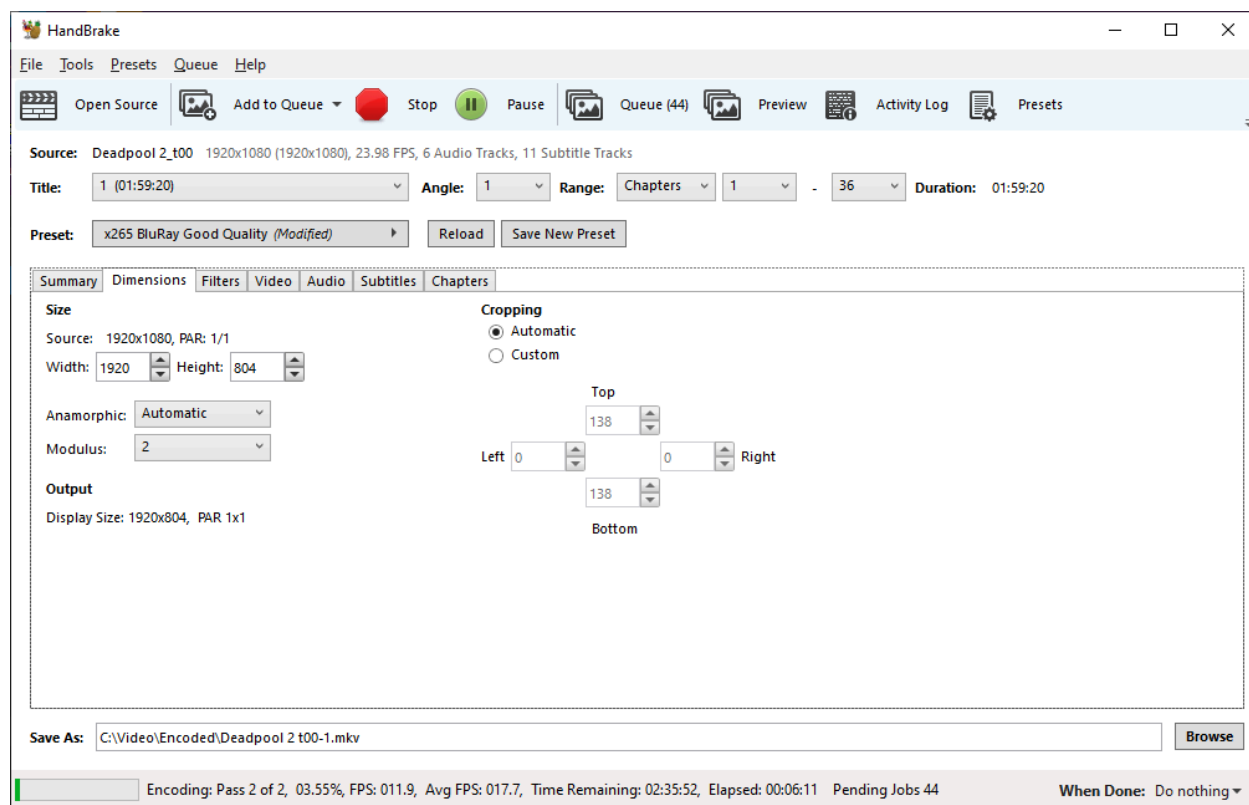

Summary

SET Format > MKV

=====

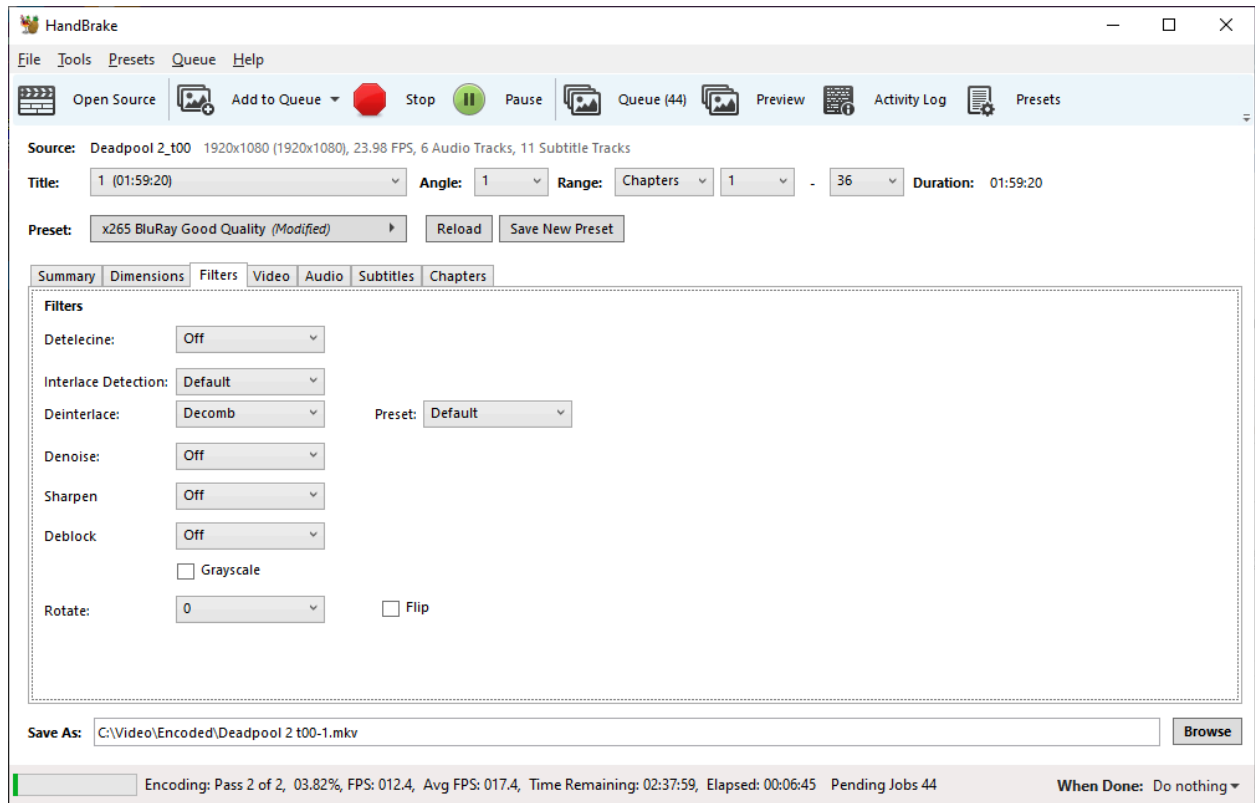

Dimensions

Generally, Cropping > Automatic works

=====

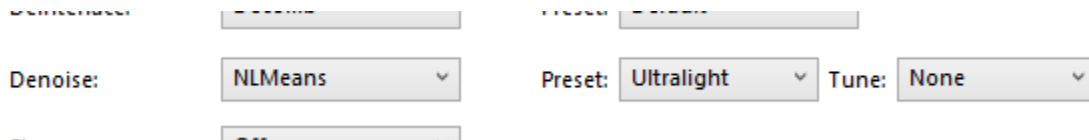

Filters

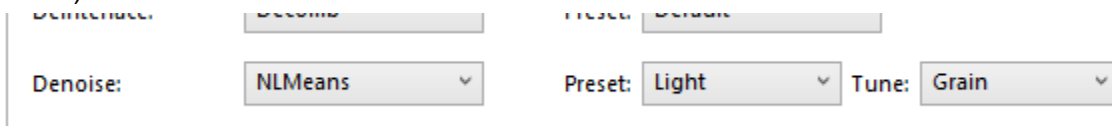

Deinterlace > Decomb > Default - Leave it set all the time, all encoding

3 Variations

- Blurays and crystal clear DVDs - No additional filters
- DVD - encoding artifacts visible or minor film grain - **SET** Denoise > NLMeans Ultralight > None

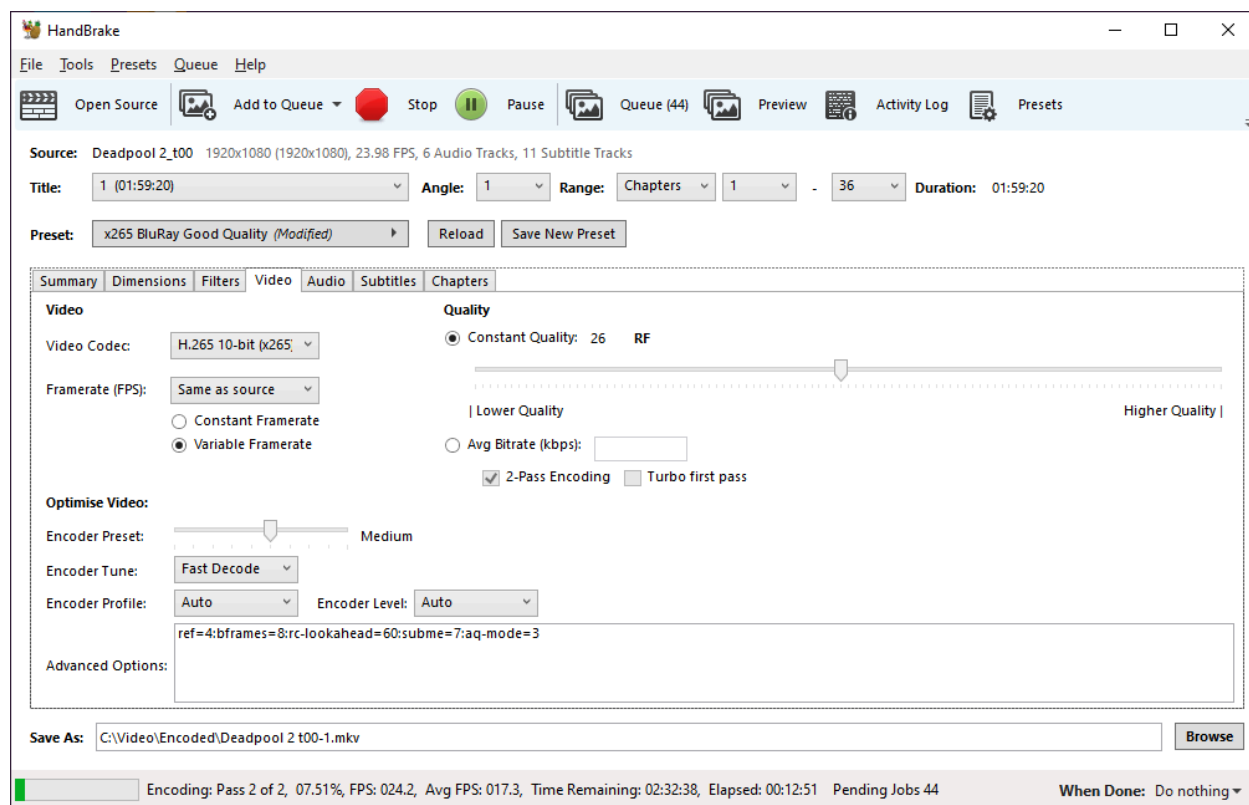

- DVD - old, heavy artifacting or grain - **SET** Denoise > NLMeans Light > Grain (tends to cause artifacting at edges of shapes and heavy contrast, but picture quality is overall better)

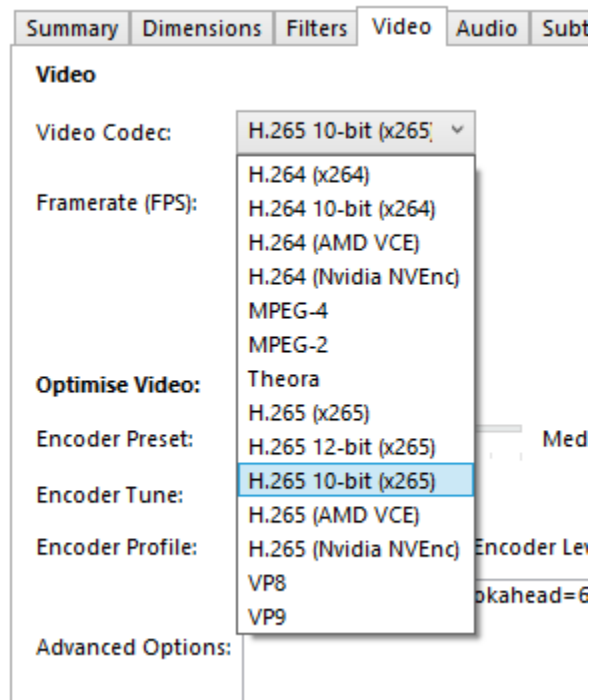

=====

Video

SET Codec > H.265 10-bit (x265)

SET Framerate > Same as source
 + Variable rate

SET Optimize Video

- Encoder Preset > **Medium**
- Encoder Tune > Fast Decode (Medium, Fast Decode leads to longer encoding times, but better picture and less effort on replay)
- Advanced Options > **ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3**
(***This is the magic*** - embeds increased reference and coding frames, and increases look ahead and back for compression optimization and picture quality)

2-Pass Encoding ☒

Optimise Video:

Encoder Preset: Medium

Encoder Tune: Fast Decode

Encoder Profile: Auto Encoder Level: Auto

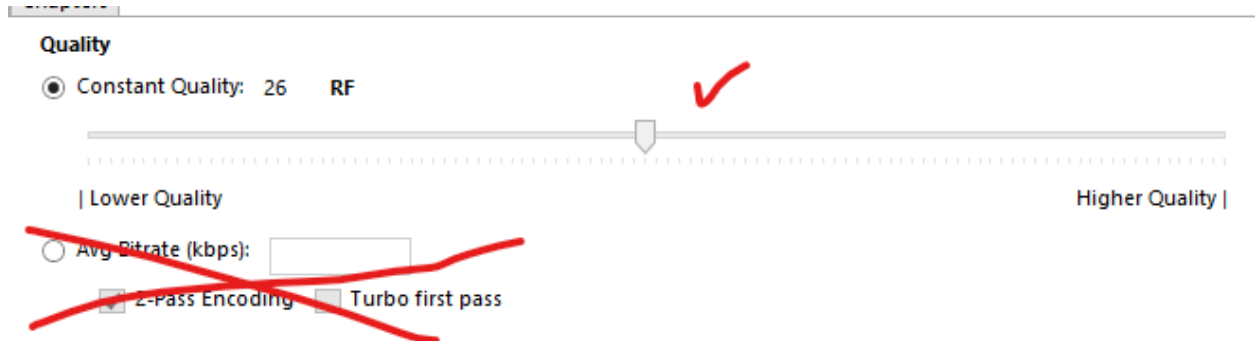

Advanced Options: ref=4:bframes=8:rc-lookahead=60:subme=7:aq-mode=3

Save As: C:\Video\Encoded\Deadpool 2 t00-1.mkv

SET Quality

- Constant Quality
- Simple version:
 - **BluRay**: Constant Quality > **25**
 - **DVD**: Constant Quality > **20**
- Longer version:
 - **Bluray**
 - **Q21** Awesome Picture - **~12% original size**
 - **Q25** - Great Picture (different but not worse than original) **~6.5% original size**
 - **Q27** Good Picture, Great compression - **~3.5% original size** - still extremely sharp, but starts to lose some of the realistic film grain, looks great on new movies
 - **DVD**
 - **Q16** Movies with constant extreme darkness, smoke/haze, compression artifacting- **~30% original size**
 - **Q18** - Best Picture (indistinguishable or better than original using Denoise filter) **~26% original size**
 - **Q20** - Great Picture (different, generally better than original using Denoise filter) **~21% original size**

- **Q23** - OK Picture, Great compression - **15% original size** - Noticeable but not distracting compression artifacting, mostly noticeable around shape edges

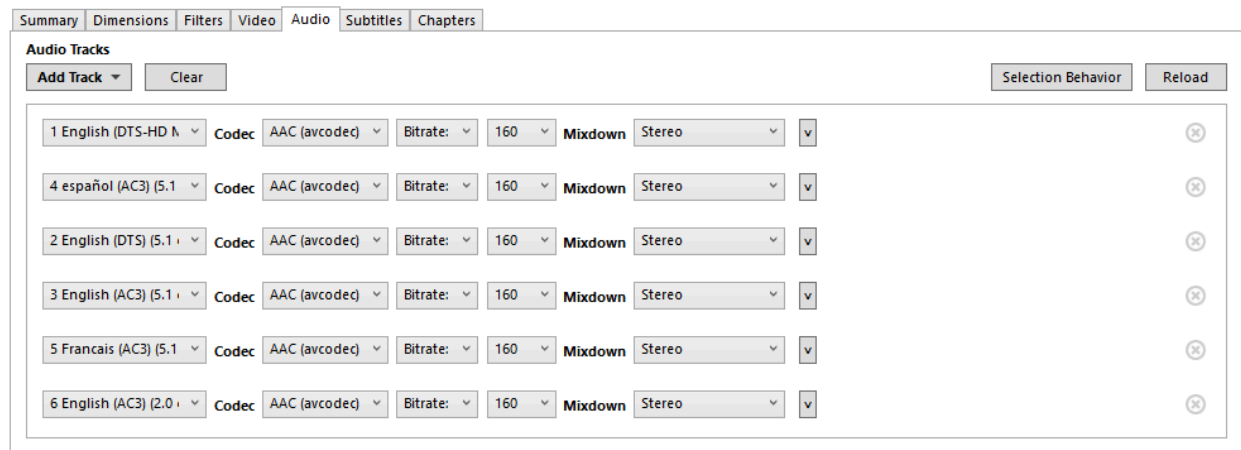

=====

Audio
